I am a FullStack Web Developer and Backend Engineer with a strong foundation in designing and developing scalable, user-friendly web applications, with a deep understanding of front-end technologies like HTML, CSS, and JavaScript (React), and expertise in back-end frameworks such as Python (Django), NodeJS, and PHP, focusing on delivering high-performance, responsive web solutions.

I have continuously refined my skills through hands-on experience and teamwork, emphasizing collaboration to achieve outstanding results. I am always eager to embrace new challenges and opportunities for growth, ensuring that the solutions I develop are cutting-edge, reliable, and meaningful. My goal is to make a lasting impact through technology, continuously improving user experiences

Skills

Frontend Development: HTML, CSS (Bootstrap, Tailwind CSS), JavaScript (ReactJS), and Responsive Web Design
